*China has set the solar subsidy allocation for 2022 at an initial US\$357.2 million. Image: Panda Green Energy.*

China has revealed its initial subsidy limits for existing renewables projects in 2022, however it remains to be seen whether the funding is to be topped up.

Earlier this week China's Ministry of Finance set out its first tranche of funding for existing renewable projects for the forthcoming year, making RMB3.87 billion (US\$607.3 million) available. Of that total, RMB2.28 billion (US\$357.2 million) has been set aside for solar PV projects, with RMB1.55 billion available for wind.
